***Allowable Subject Matter***

2. Claims 1-8, 16-19, and 56-77 are allowed.

Regarding Claim 1, Philipsson and Labun do not teach, alone nor in combination, the combination of:

Using a notification for setting a short-range communication module in the second terminal into a page scanning mode for detecting paging signals directed to the second terminal;

responding to an RF-ID interrogation signal by transmitting a RF-ID response signal to the first terminal including identification information relating to the short-range communication module of the second terminal;

processing the received RF-ID response signal by the first terminal to activate a short-range communication module in the first terminal to initiate a shortened session setup by skipping the inquiry mode; transmitting a short-range paging signal directed to

the second terminal based on information of the received RF-ID response signal and entering a page mode to establish a short-range connection with the second terminal; and

detecting the paging signal by the short range communication module in the second terminal for immediate establishment of a short range connection between the first and second terminals by skipping the inquiry mode.

Claim 75 is allowable for similar reasons as claim 1.

Regarding Claim 56, Philipsson and Labun do not teach, alone nor in combination, instructing an associated wireless short-range communication module to skip an inquiry stage and enter into a predefined shortened session set-up operation mode for detecting paging signals addressed to said wireless short-range communication module in response to the notification signal.

Claim 68 is allowable for similar reasons as claim 56.

Regarding Claim 62, Philipsson and Labun do not teach, alone nor in combination, instructing the wireless short range-communication module to skip an inquiry stage and enter into a predefined operation mode for detecting paging signals addressed to the wireless short-range communication module in response to receiving a notification signal indicating presence of the RF-ID interrogation signal from the near field communication module.
